

Environmental Club

Environmental Club

- The Environmental Club drives sustainability practices and promotes environmental responsibility within the school community.
- CCA sessions are held on Mondays.
- This year, club members launched the PSS Recycle Right Competition to encourage Punggolites to adopt an eco-conscious lifestyle and recycle the right way. The competition saw 8,500 containers recycled within 15 weeks. Green initiatives like this helped the school to clinch the **Sustained Vanda Miss Joaquim Award** for the School Green Awards in 2021
- To further enrich members' learning experiences, the club organises beach cleanups to reduce marine pollution and is currently partnering Nature Society Singapore to monitor and collect data on biodiversity.

Reflection by Christabel Toh, Class 2E

“From this CCA, I have discovered my strengths and weaknesses with my interests in contributing to saving the environment. I have also learnt to become a more confident learner by presenting my ideas and message in front of a large audience without fear. I also learned new skills and values, such as teamwork and perseverance, along with being aware of sustainability issues through various competitions and projects. I am more confident of socialising well with my CCA mates and leading others in projects and activities that help benefit the Earth.”

Reflection by Hee Sen, Class 3E

“In Environmental Club, I have learnt that I need to show a strong sense of self-respect and propriety as a CCA leader. I have learnt to be confident and to manage my time wisely through the many opportunities presented to me such as presentations to my schoolmates and creating publicity materials to raise awareness. We also learnt to work as a team to help nature heal and bring more awareness on the need to save our planet. I have learnt the importance of caring for the Earth and being a person who can express himself.”
